## > Basic operation of the EV Charger

1. Click "My Site" at serial number ① to enter the interface of My Power Station and then click the EV Charger added at serial number ② to enter the EV Charger control interface, and then click "Start" at serial number ③ of the EV Charger control interface when the charging gun is connected to turn on charging. If the charging gun is not connected, you can adjust the maximum output current value by sliding at serial number ④.

2. Click the "Mode" button at serial number (5) to select the control mode of the EV Charger in the pop-up control mode selection interface at serial number (6).

Mode 1: Plug and Play Mode

Select this mode, connect the charging gun to turn on charging directly.

Mode 2: Controlled Mode

Select this mode, after connecting the charging gun, you need to swipe the card or use the APP to click the "start" button at serial number ③ to start charging.

Mode 3: Locked Mode

Selecting this mode, the EV Charger is locked and charging is prohibited (the charging indicator of the EV Charger is yellow in this mode).

3. Click the "Schedule" button at serial number ⑦ in the EV Charger control interface, click the "Single" button at serial number ⑧ in the charging timer interface, and set the timer start and end time at serial number ⑨. Click the "cycle" button at serial number ⑩, and then set up the charging task for seven days a week in the pop-up cycle setting interface. Note: Timed charging does not take effect in Plug and Play mode!
